

Simulation for Law Enforcement Mission Success

What makes the Airbus Astar AS350 B2/B3 simulator unique?

- Specially configured for **law enforcement operational mission scenarios**
- **Integrated pilot and crew training scenarios** - Located in Grand Prairie, Texas, close to the DFW airport
- **High Flexibility** – providing support from initial qualifications, to advanced airborne use of force scenarios that integrate crew communication and aim/strike gunnery training
- **Integrated into the Airbus Training Academy** - law enforcement agencies can benefit from access to aircraft as well as technical consultants

Which police agencies have used the simulator for training?

- Today, there are more than **50 operators** with more than **200 aircraft** in North America flying the **H125/A-star** family, and some of the largest law enforcement operators trust us to help them fly safely
- “The AS350 Full Motion simulator has been an instrumental part of the **Seminole County Sheriff’s Office Aviation annual training**. The simulator allows us to perform all of the emergency procedures...that cannot be duplicated in the aircraft. We would highly recommend that all AS350 operators incorporate the full motion simulator into their training” – **Chief Pilot, Sgt. Steve Farris**

How does the simulator improve mission safety?

- Allows law enforcement teams to **safely train together** in risky scenarios
- **Full-sized cabin** accommodates the pilot and co-pilot (Tactical Flight Officer) allowing the crew to train the same way it would operate in a real life scenario, increasing chance of **mission success**
- **Day/night VFR and IFR capability**; VEMD; AeroComputer moving map system with FLIR Star Safire III, flight and tactical radios, autopilot and NVG-compatible cockpit

Contact us:

- Simulators are available **18 hours per day, 7 days per week**
